

Eversource - Upcoming activities scheduled for Monday, June 12, 2017

I wanted to keep you informed of upcoming activities for the Eversource Sudbury to Hudson Reliability Project. Next week, on Monday, June 12, the Massachusetts Environmental Policy Act Office (MEPA) will host a site visit and scoping session for the Project. The site visit will include two stops along the proposed Project route on the MBTA corridor, this site visit will begin at 3pm. The scoping session will take place at the Lincoln Sudbury Regional High School Auditorium starting at 6pm and will include a short presentation from the Eversource Project Team specific to the Environmental Notification Form (ENF) filing.

The scoping session will allow the public to obtain additional Project details and information on how to participate in the MEPA process. It is important to note that while the public may speak at the scoping session, only written comments/questions provided to MEPA become part of the formal MEPA record. Such written comments/questions can be submitted at the scoping session.

Both the site visit and the scoping session will be publicized by MEPA in the Environmental Monitor (link below).

Please contact me if you have any questions.

Regards,

JoAnne O'Leary
Community Relations Specialist.
