

## **CD SCRATCH ART**

Materials:

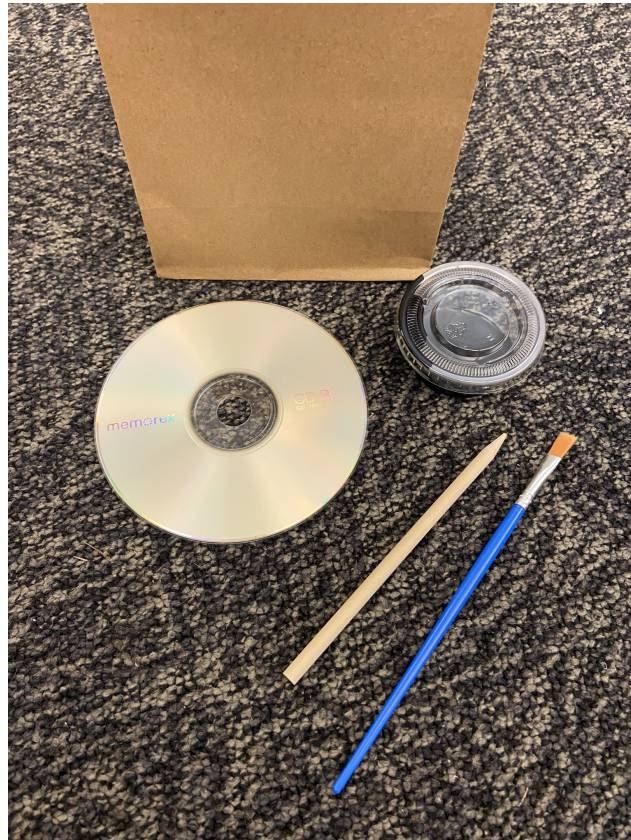

CD

Black acrylic paint

1 paintbrush

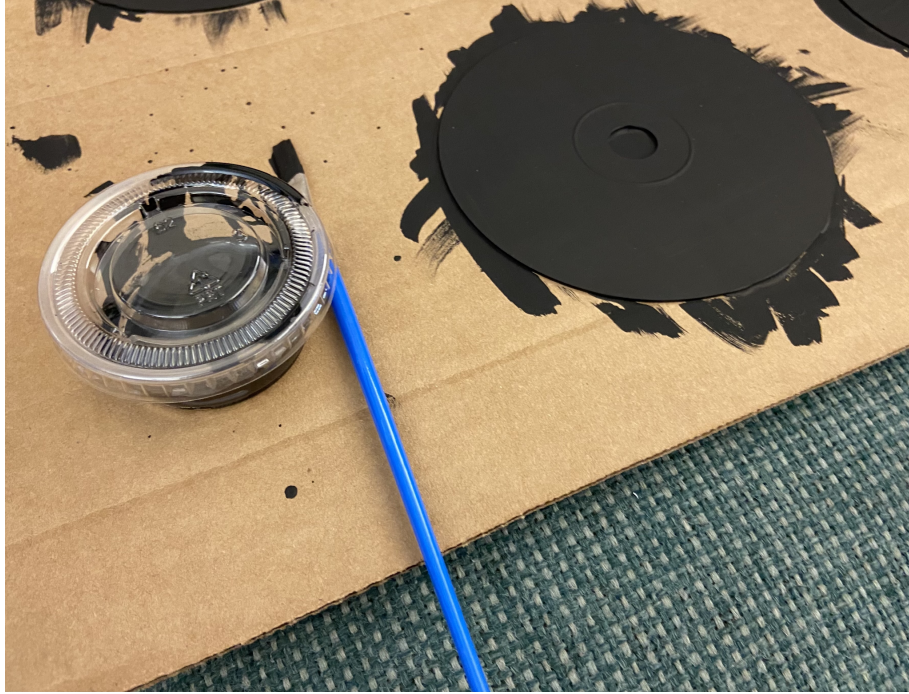

Wooden dowel

Pencil (optional)

Step 1: Paint the shiny side of the CD until it is completely black. You may need 2-3 coats to cover it completely. If you have a different color of acrylic paint you'd like to use, go for it!

Step 2: Let the CD dry completely. This is really important!

Step 3: Use a pencil to lightly draw whatever design you would like. Drawing lightly is important as pencil doesn't erase well on the painted surface. This step is optional since you can also draw free-hand if you prefer.

Step 4: Using the wooden dowel, scratch along the pencil lines you've made until you see the shiny side of the CD. You may have to go over the lines more than once.

Ta-da! You now have a fantastic work of art that would make a great suncatcher or coaster!
