

# Easy Origami Box

1

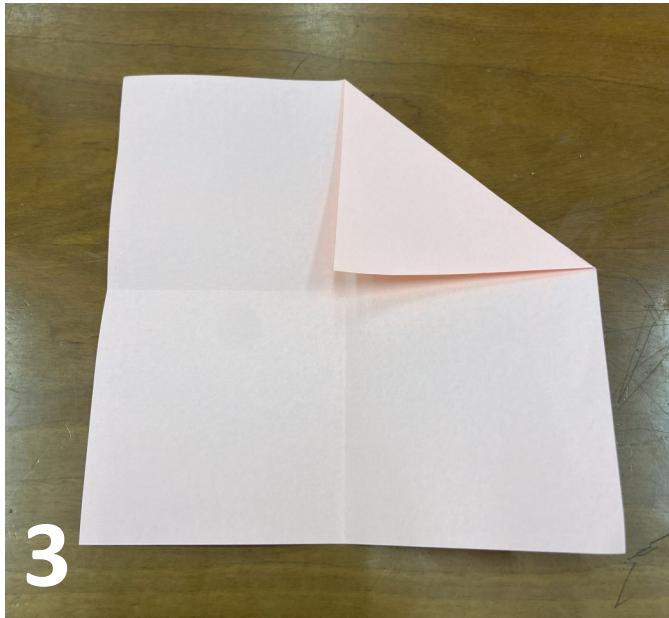

2

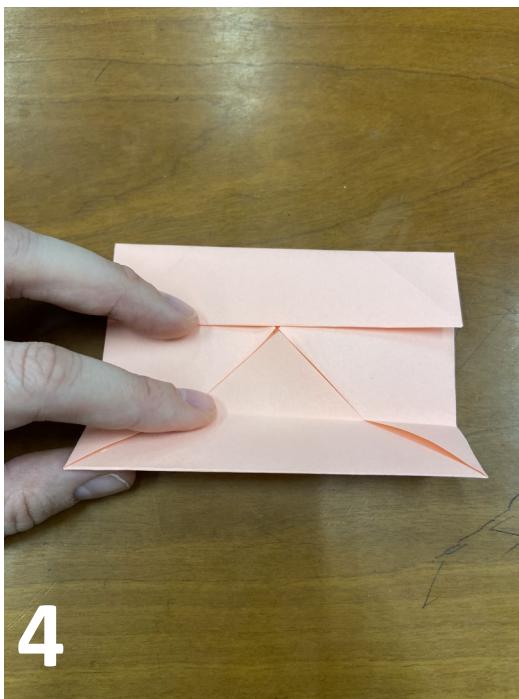

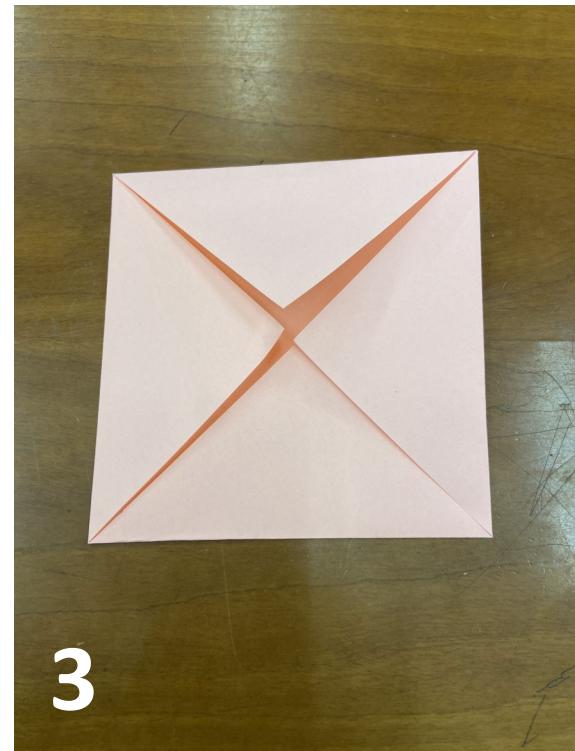

Step 1) Start with a square sheet of paper. Fold the paper in half horizontally. Crease it well and then unfold it.

Step 2) Fold the paper in half vertically. Crease it well and then unfold it.

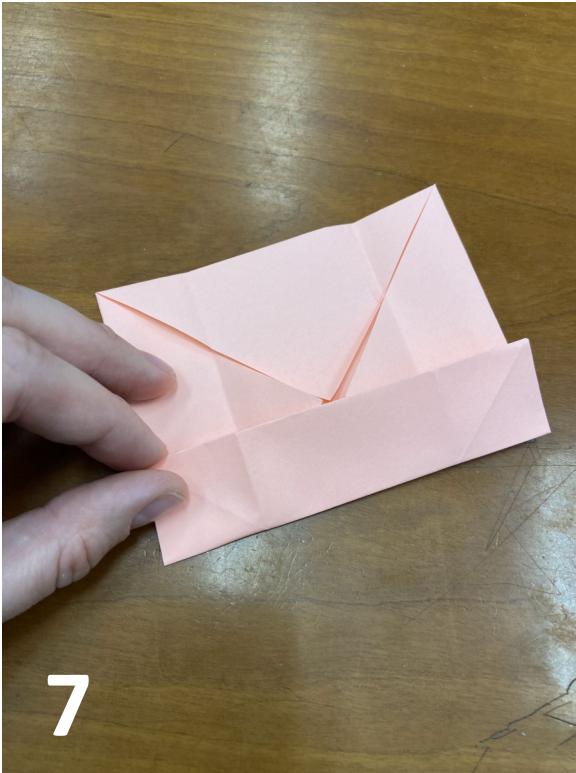

Step 3) Fold the corner of the paper to the center. You'll do this on each of the 4 corners.

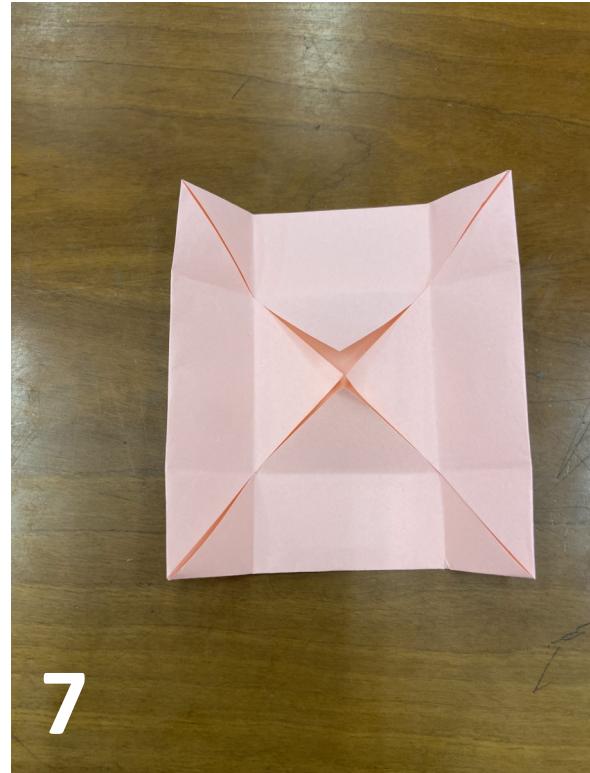

Step 4) Fold the top half of the model in half to the center.

Step 5) Fold the bottom half of the model in half to the center.

Step 6) Crease both these folds very well and then unfold them.

7

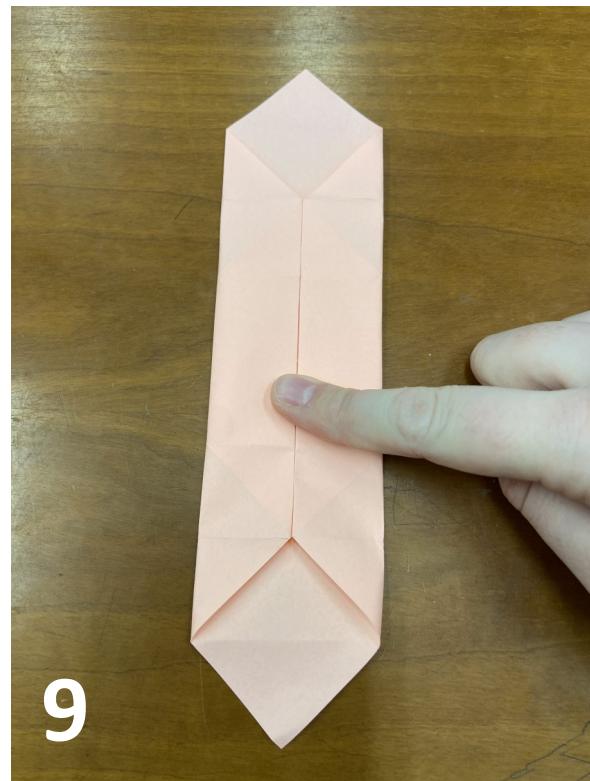

7

Step 7) Rotate the model  $180^\circ$  and repeat Step 6.

8

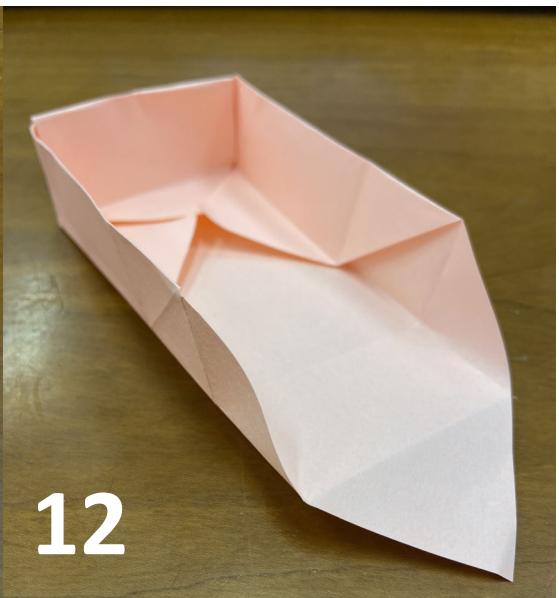

9

Step 8) Unfold the top and bottom triangles of paper.

Step 9) Fold the right and left sides of the model to the center.

Part of this crease is already here which will make it a bit easier.

Step 10) Slowly pull the model open at the tops. The creases here are already made.

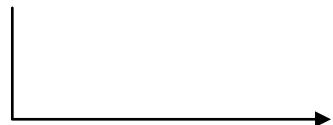

Step 11) When you pull the model open it should take a shape that looks like this. The creases are all already made so everything should fall into place.

Step 12) Fold the flap of paper down along the intersection of the two triangles. This will form the edge of the box. Fold the top triangle of paper up a little bit to fit into place at the bottom of the box.

Now you have a completed box!

If you want to make a lid, you can either use larger paper or when you get to Step 3, just don't fold the corners all the way into the center.

Completed box

Completed box with lid
