

Easy Origami Jumping Frog

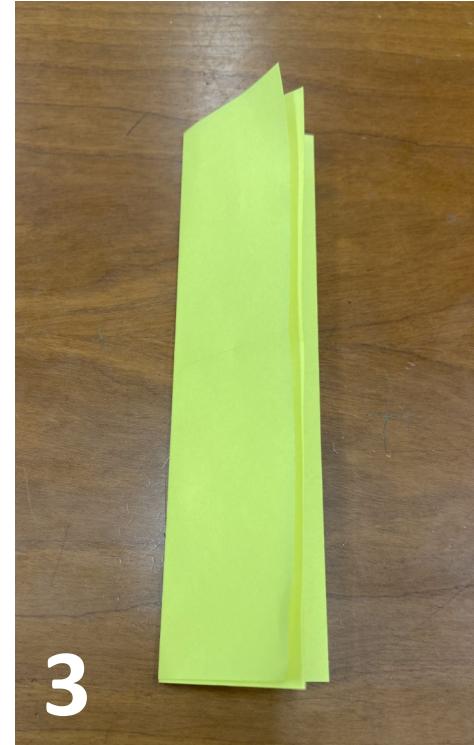

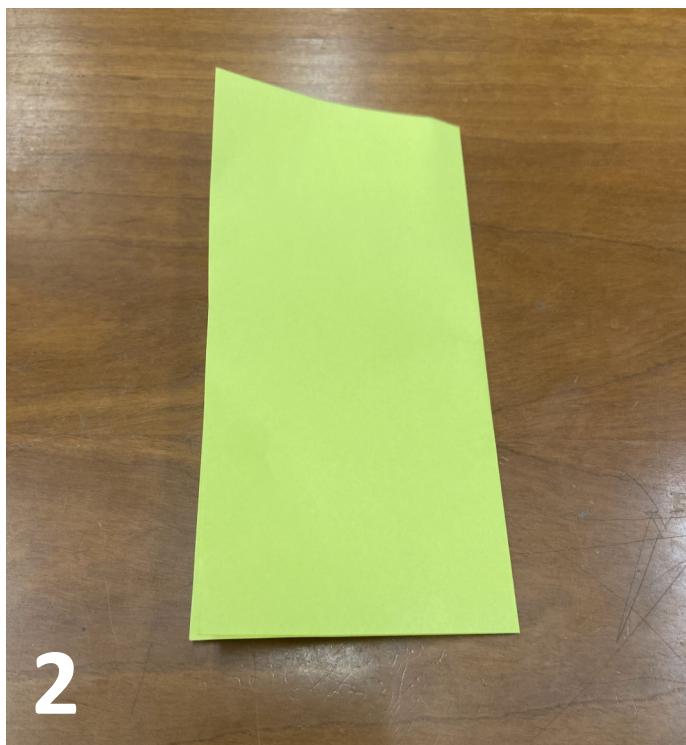

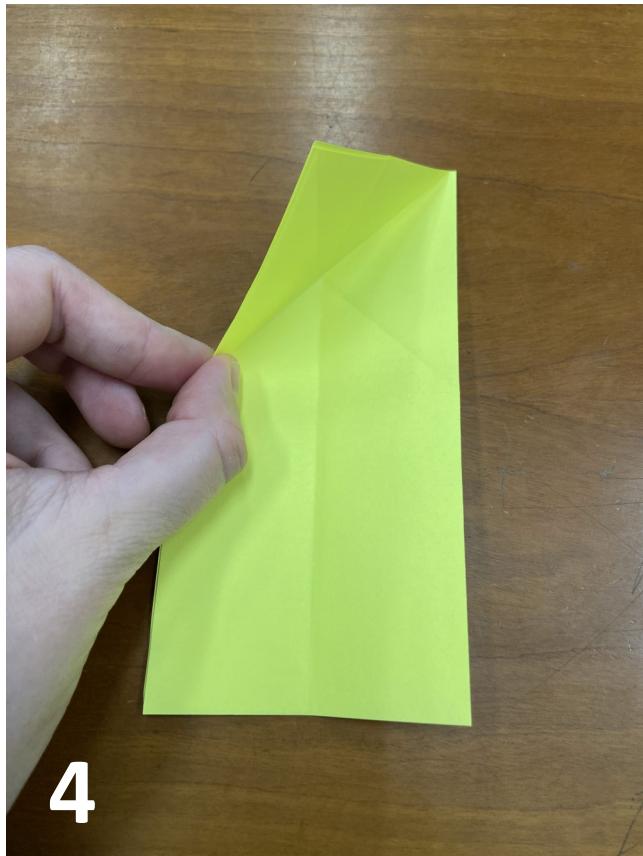

Step 1) Start with a square sheet of paper. Fold it in half horizontally and then unfold.

Step 2) Fold the paper in half vertically.

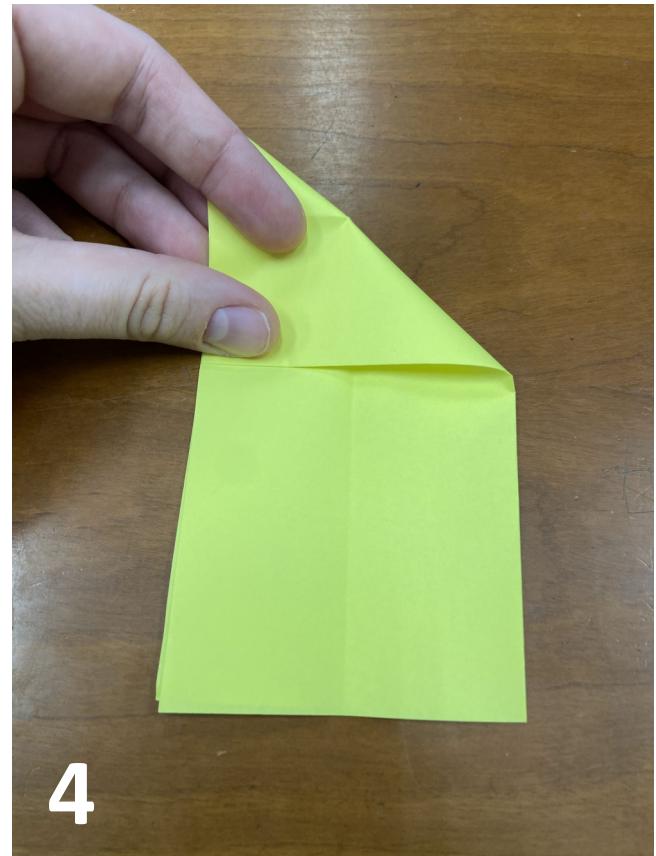

Step 3) Fold the paper in half vertically again and then unfold it.

You'll use this crease as a guide in later steps.

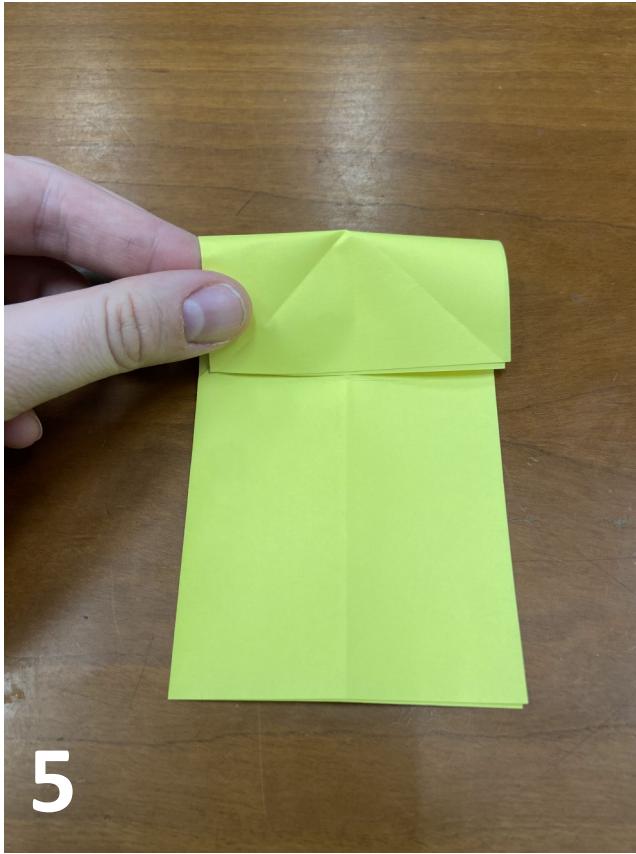

4

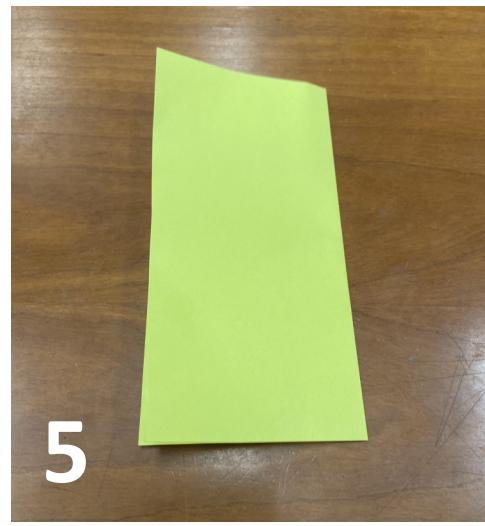

4

Step 4) Fold the corner down to the center of the paper, then unfold. Repeat with the other corner. Turn the paper over.

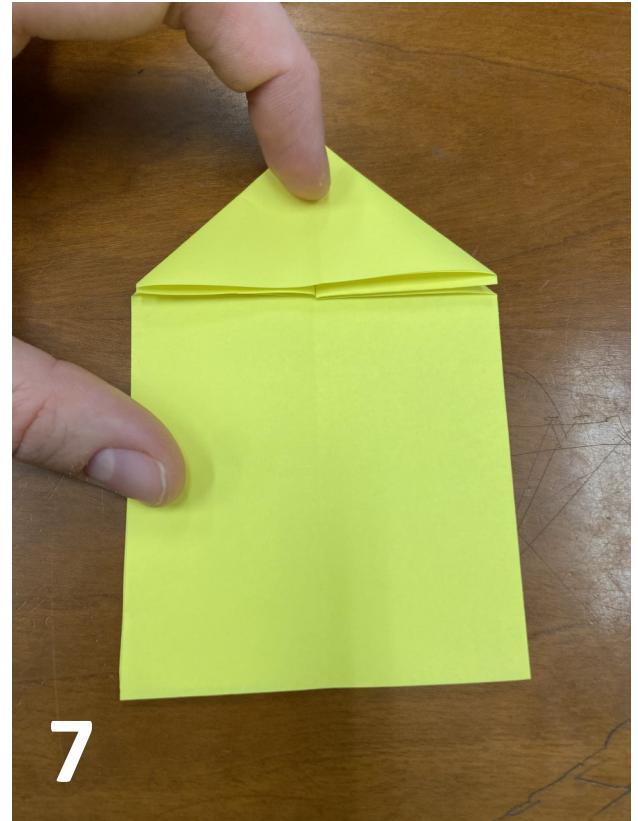

5

Step 5) Fold down 1/4 of the paper down so the top edge meets the center, then unfold and turn paper back over how it was before.

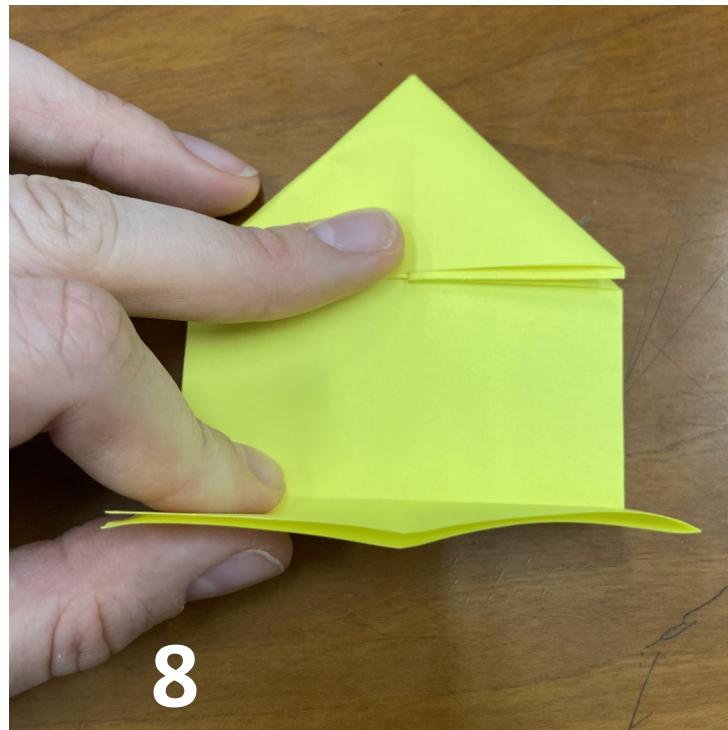

5

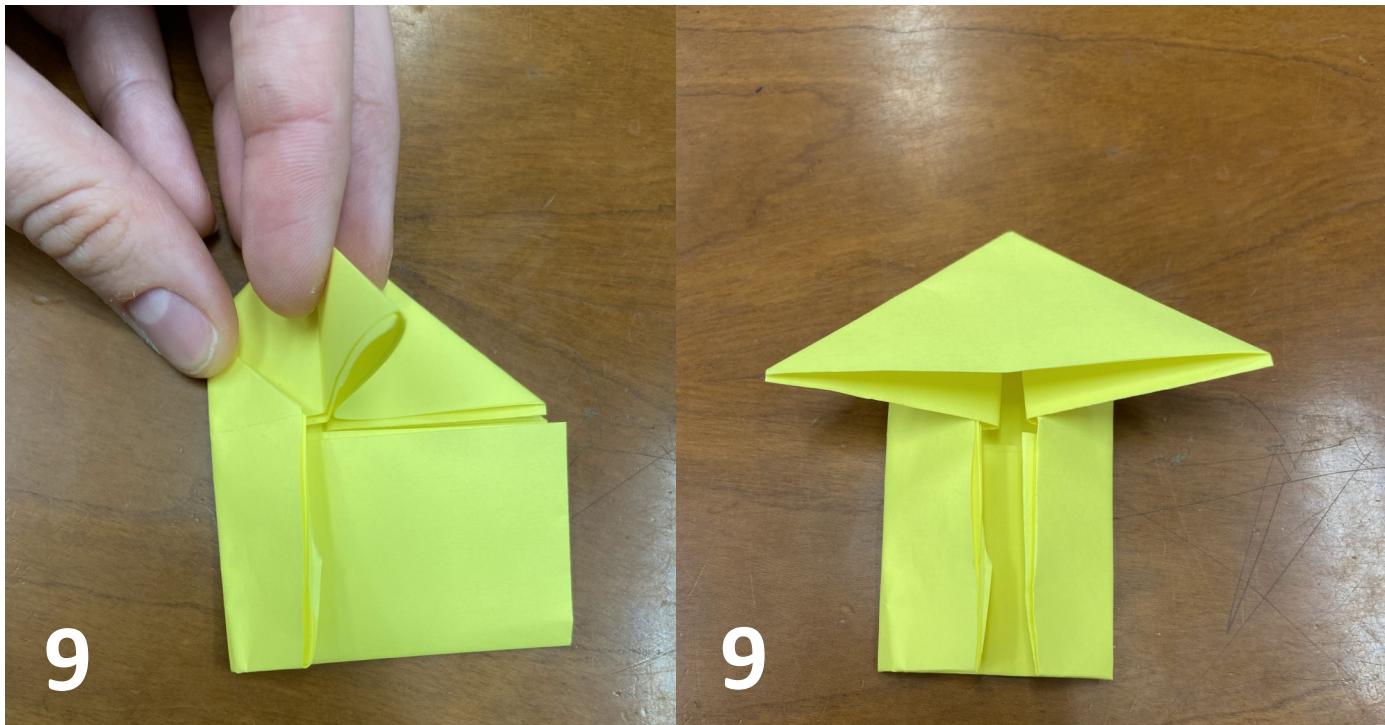

Step 6) Fold the paper down along the existing creases

Step 7) Push everything down flat.

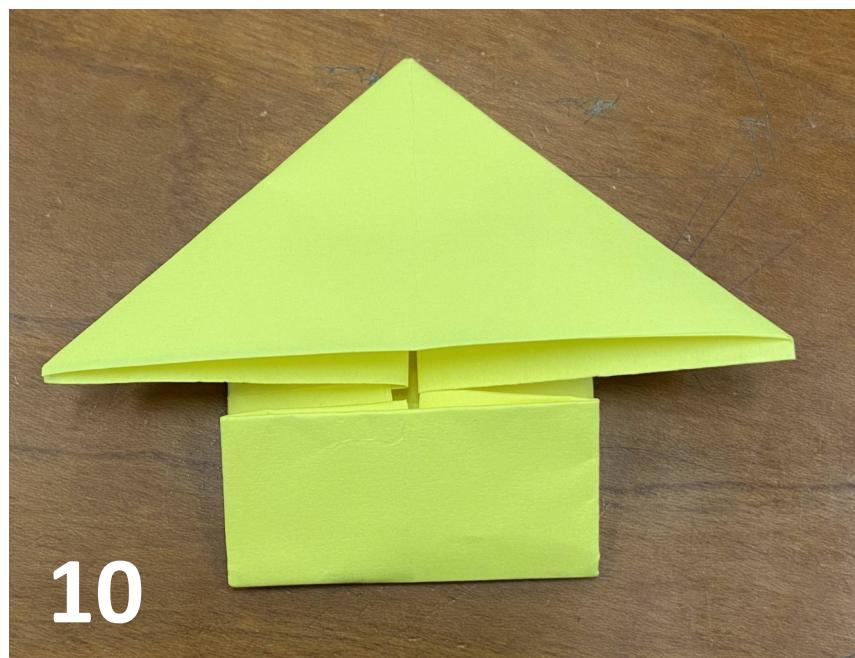

Step 8) Fold the bottom part of the paper up along the dotted line.

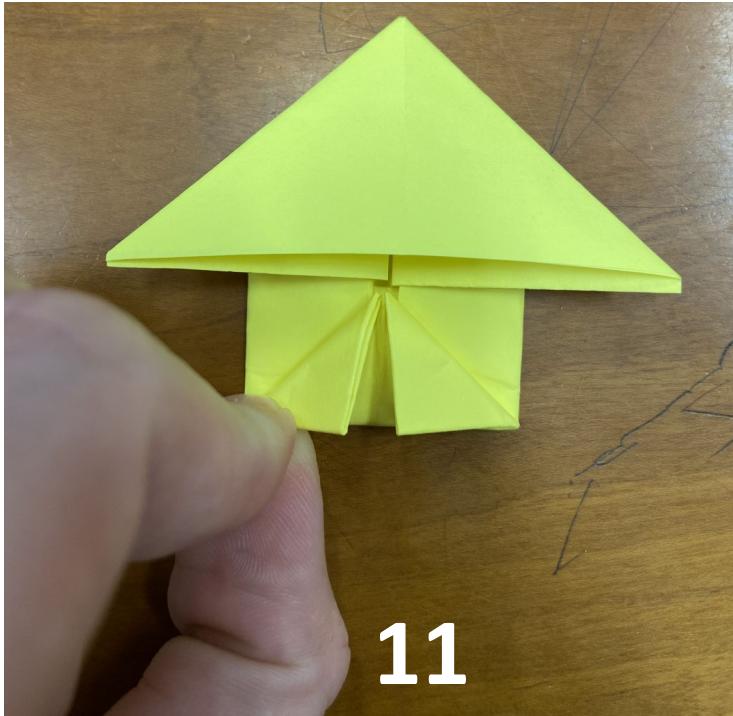

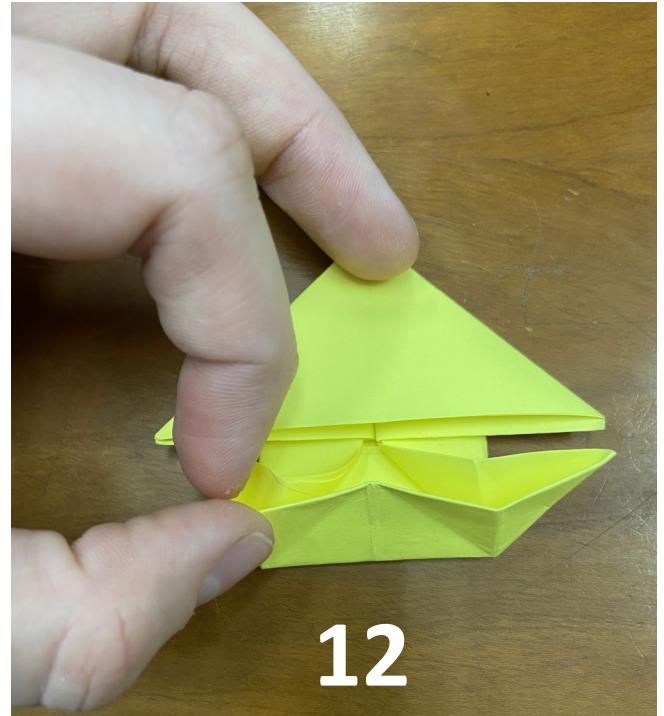

Step 9) Fold the left side of the paper towards the center. Don't fold that top triangle. The paper will tuck in behind it. Repeat on the right side. Again, don't fold the top triangle but tuck the paper in behind it.

Step 10) Fold the bottom part of the paper up so the bottom edge meets the bottom of the triangle

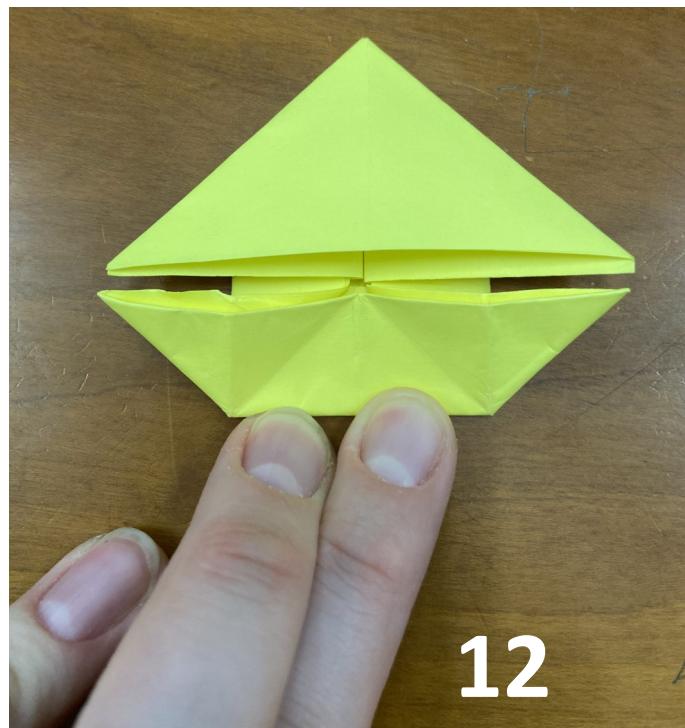

11

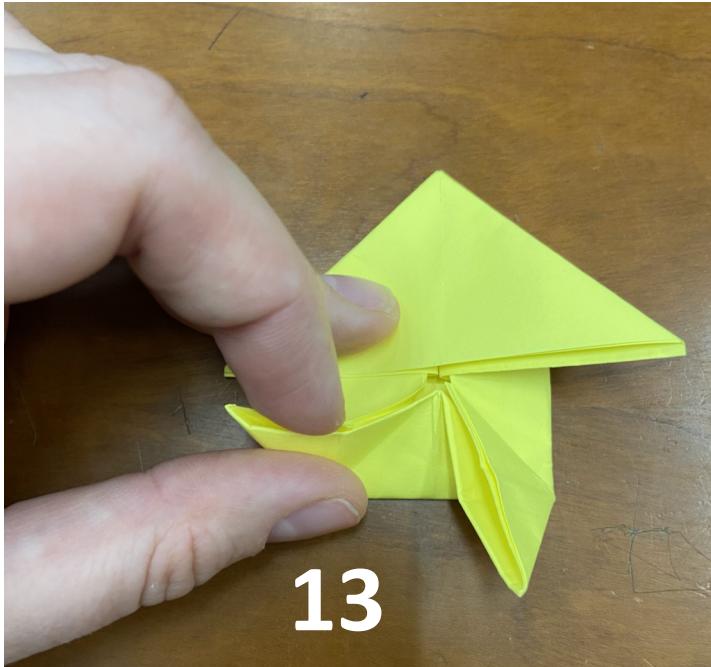

12

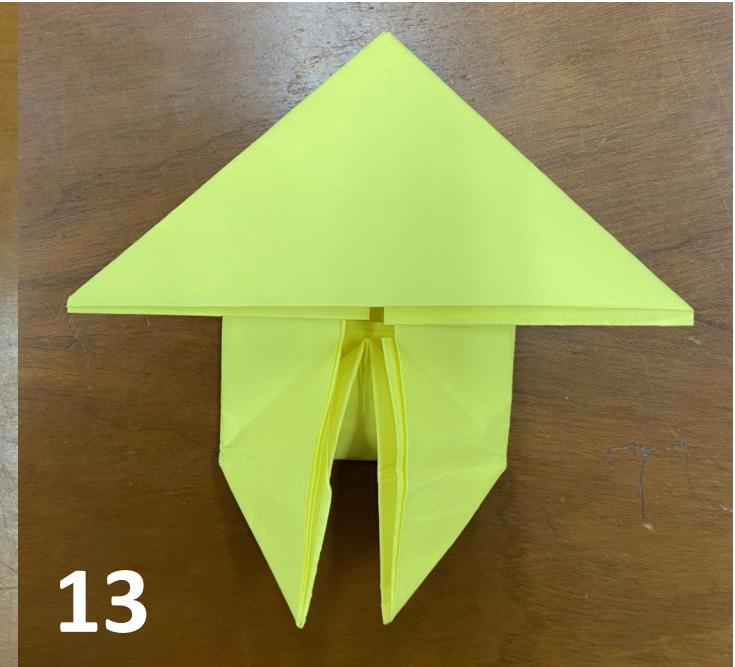

Step 11) Fold the corner down along diagonally. Crease this fold well and then unfold it. Repeat with the other corner.
Step 12) Pull the two flaps of paper on the inside of either side out. It will look kind of like a little sailboat.

12

13

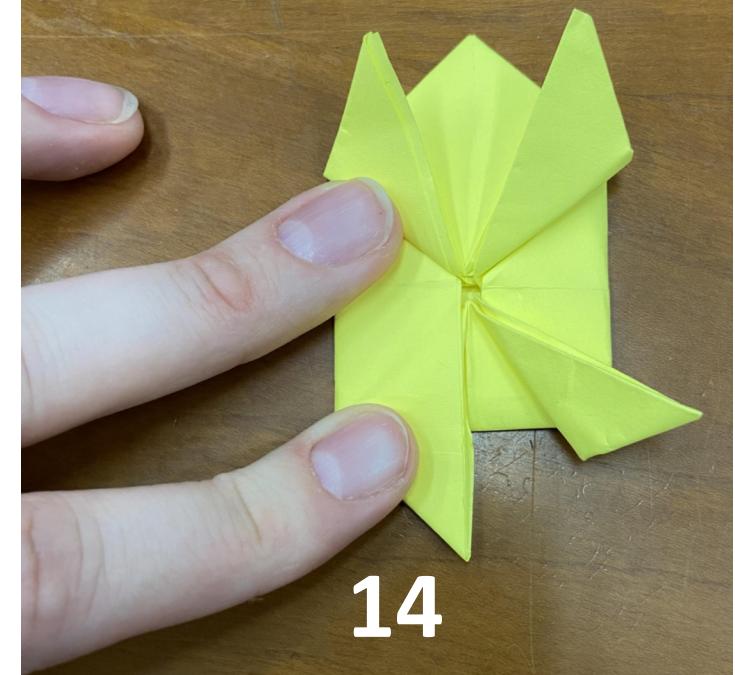

13

Step 13) Fold the two flaps of paper on each side down along the center line.

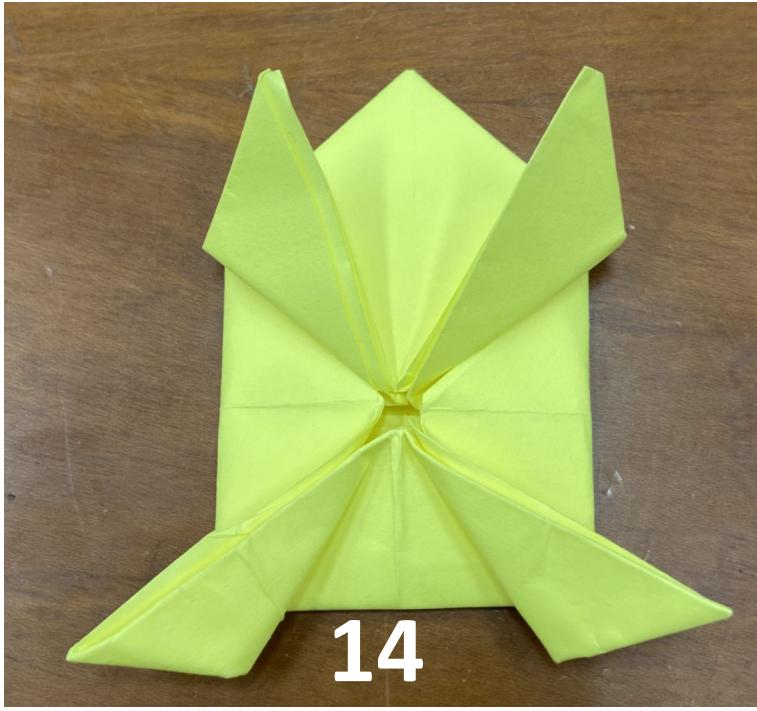

Step 14) Fold the top right part of the paper up diagonally. This will make one of the frog's front legs. Repeat this step, making diagonal folds on the other 3 legs. Don't worry about the angle of the crease. As long as you get a shape like what you see in the next photos it's fine.

14

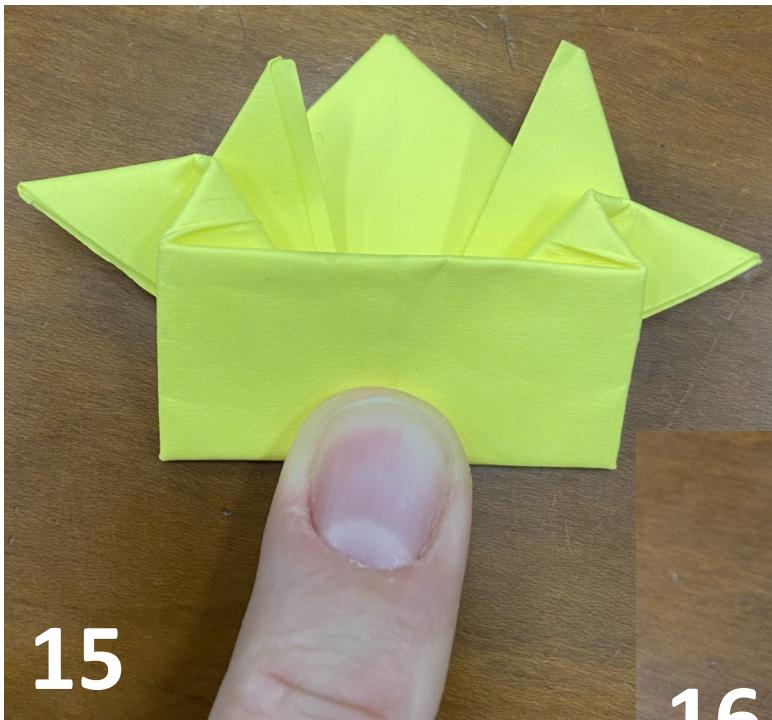

14

Step 15) Fold the entire model up along the center crease.

Step 16) Fold the top part of the model back down in half.

Step 17) Turn the whole model over.

If you push down on the folds on its back you can make it jump!
