Eric M. Ryder
Director of Public Works

**TOWN OF HUDSON
DEPARTMENT OF PUBLIC WORKS
SPECIFICATIONS
FOR
CATCH BASIN CLEANING**

1.1 LOCATION AND WORK TO BE DONE

The herein specified to be done under this section consists of all labor and equipment necessary for the satisfactory completion of cleaning approximately 1,700 Catch Basins at various locations throughout the Town of Hudson.

1.2 TIME OF COMPLETION

Work under this contract shall begin within ten (10) days after notice to proceed, and shall be performed on a continual basis. Invoicing for work performed must be submitted by June 15, 2026.

1.3 DISPOSAL OF MATERIAL

All debris removed from the catch basins will be stockpiled at the D.P.W. maintenance yard located at 1 Municipal Drive.

1.4 PREVAILING WAGES

Minimum wages to be paid on the work of the project are established by a Schedule issued by the Commissioner of Labor and Industries, a copy of which is contained in the Contract Documents and will be made a part of the Contract.

1.5 CONTRACTOR'S OBLIGATIONS

The Contractor shall provide sufficient labor and equipment to perform the required work within the time frame for completion. A supervisor shall report to the General Foreman any problems detected with the basins as well as daily slips indicating the streets and numbers of basins that have been cleaned.

1.6 INSURANCE

The Contractor shall supply the Town of Hudson with a Certificate of Insurance indicating the following coverage:

- A. Worker's Compensation in accordance with the General Laws of the Commonwealth of Massachusetts. The Certificate shall name the Town as an additional insured.
- B. General Liability Insurance in the amount of \$500,000. The certificate shall name the Town as an additional insured.
- C. Automobile liability in the following amounts:

I Bodily Injury	\$ 500,000 each occurrence
	\$1,500,000 aggregate
II Property Damage	\$ 500,000 each occurrence
	\$1,500,000 aggregate

1.7 GENERAL INFORMATION

The Town's obligation under this contract is contingent upon the availability of appropriated funds from which payment for contract purposes can be made. No legal liability on the part of the Town for any payment may arise until funds are made available to the awarding agency for this contract and until the Contractor receives notice of such availability through the notice to proceed.

Procedure:

The Town of Hudson issues an annual contract to clean and inspect about 50% of the catch basins.

Under the contract, the Contractor is responsible to clean and inspect the town-owned catch basins within certain portions of the Town. The work commences after the notice to proceed is issued, and completed within the Permit Year. Upon the issuance of a Notice to Proceed, a map depicting the catch basins scheduled for cleaning will be provided.

The Contractor is responsible to clean each basin to the bottom. All walls will be scraped, with the residual fill being removed to a minimum of 4" from the bottom when leveled. At the completion of each cleaning, the basin lid, frame and surrounding area shall be swept. Jetting or rodding may be required to loosen debris materials to assure complete removal. Along with cleaning, the contractor is responsible for recording the depth cleaned and reporting any illicit discharges and needed structural repairs (See Appendix A). •

Reporting - The Contractor will use a computer tablet accessing a town provided online form to record the cleaning and inspection. The data collected will include the following information:

1. The depth of the catch basin before and after cleaning
2. Presence and type of Illicit Discharges
3. Need of Repair
4. Change in Location of Catch Basin (GIS) – in comments.

Equipment Specifications - The Contractor shall supply sufficient equipment to remove the accumulated dirt, refuse and other debris from catch basins. Basin cleaners shall be a minimum of 18" orange peel bucket type capable of cleaning basins to within four (4) inches of the bottom. Additional bucket of smaller size must be available for cleaning off-set structures. The vehicle must have a minimum of a five (5) yard cubic yard dump body. Consideration will be given to proposals using other type of equipment. Basin cleaners shall be capable of hauling and disposing of basin debris.

Basin cleaners and equipment shall be kept clean and in good operating condition throughout the Contract Period.

Other Methods that may be used in cleaning (during emergencies) are as follows:

- A. Manually use a shovel to remove accumulated sediments
- B. Use of vacuum truck to suction remove sediment and use the rodder of the clean downstream pipe and pull back sediment that might have entered downstream pipe
- C. Use a high-pressure washer to clean any remaining material out of catch basin while capturing the slurry with a vacuum.

Illicit Discharge Detection: As part of the cleaning process the contractor will be evaluating the catch basin for any evidence that may indicate an illicit discharge or connection (See Appendix A: Catch Basin Cleaning Data Collection.) When the location of a catch basin and type of illicit

discharge is reported to the Town via the online form, it will then be investigated as detailed in the Town's IDDE Plan.

An estimated schedule of work must be coordinated with the Town of Hudson. A kick off meeting must be initiated by the contractor to familiarize the area of work and the applications used for data recording.

The town shall provide:

1. An excel sheet with summary counts of catch basin on streets and locations.
2. A GIS map print out with highlighted catch basin locations.
3. Login information for the application used for data recording.
